DETAILED ACTION

Applicants' submission, filed 5/2/2007, has been received. Claims 1 – 19 are pending.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

The provisional rejection of claims 1 – 19 as provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 - 17 of copending Application No. 10/526,576 is **withdrawn as moot** in view of the timely filed terminal disclaimer.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Application/Control Number: 10/658,522

Art Unit: 1615

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 – 3, 5 – 7 **remain** rejected under 35 U.S.C. 103(a) as being unpatentable over Timmermann, US 6,177,580 in combination with Barclay EP 0726321 for reasons of record and those discussed below.

Response to Arguments

Applicants' arguments have been fully considered, but are not persuasive. Applicant argues that the following the procedures of Timmermann would make the process of Barclay unworkable. This argument is understood to apply only to the instant process claims, and not to the product claims (which do not require and are not limited by process steps). The argument is not persuasive because it is not based on any technical reasoning or evidence. Applicants' merely allege that the temperatures required by Timmermann would render the biological materials of Barclay unsuitable for use, but provide no reasoning or evidence other than their own allegation. Applicants' also argue that the references are not combinable because Barclay teaches biological methods whereas Timmermann is directed to synthetic methods. However, Barclay gives reasons why biological methods are preferable to synthetic methods. As such, the artisan would find it obvious to take the beneficial teachings of Timmermann (high yields, lack of phospholipids and LC-PUFA's), and apply them to the improvements offered by Barclay. Applicants' further argue that the art does not teach 60% or greater. In response Timmermann's teaching of high yield is deemed to meet this requirement, or at a minimum, suggest that the yield should ideally be close to 100% thus suggesting this requirement.

Art Unit: 1615

Claims 8, 9 and 10 **remain** rejected under 35 U.S.C. 103(a) as being unpatentable over Timmermann, Barclay and Todd.

Response to Arguments

Applicants' arguments have been fully considered, but are not persuasive.

Applicants' argue that Todd does not make up for the supposed deficiencies in

Timmermann and Barclay. These alleged deficiencies have been addressed, *supra*.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric E. Silverman, PhD whose telephone number is 571 272 5549. The examiner can normally be reached on Monday to Friday 7:30 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on 571 272 8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
